

INTELLEXGIS

Leverage your
ArcGIS® System with
a full suite of industry
specific tools combined
with top quality data

IGIS allows users to make advanced queries, build sophisticated maps, manage multiple data sets, and import & export data, all within a user friendly environment .

INTELLEXGIS-ONSHORE is a powerful exploration tool for use within **ESRI's ArcGIS® System**. This tool represents a collaboration of software intelligence and database management put forth by Energy Graphics over the past thirty years. **INTELLEXGIS-ONSHORE** offers **ESRI** users the ability to utilize a wide range of custom tools built especially for the petroleum industry. This application brings the robust mapping functionality, industry preferred database management tools, and user-friendly interface of the **INTELLEX™ Exploration System** from Energy Graphics, Inc. directly into **ArcGIS**.

Data included:

- ◆ **Culture** – roads, water, boundaries, rails, etc. for all US.
- ◆ **Louisiana** – Leases, Wells, township, state waters, boundaries, etc.
- ◆ **Texas** – Wells, State water leases, survey, etc.
- ◆ **Tobin** – Wells, leases, ownership, township, survey, culture, etc.
- ◆ **Other 3rd Party** – HTSI pipeline, culture. Sonris, MMS, PDI.
- ◆ **ESRI** – shape, dbf, GDB, SDE, etc.
